## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 4, 7, 10 and 13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a liquid crystal display comprising various elements as claimed, more specifically, as the following:

in the color liquid crystal display wherein the resistance value of the black matrix is greater than  $10^2 \Omega \text{ cm}$  and less than  $10^5 \Omega \text{ cm}$  [claim 1].

The claims 4, 7, 10 and 13 are dependent on the claim1.

The closest reference US 5,718,992 (Sato et al) discloses that the light-shielding properties having a volume resistivity of  $10^2 \Omega \text{ cm}$  to  $10^{12} \Omega \text{ cm}$  is for black and white display, and it is desired for the black matrix to have the volume resistivity of  $10^6 \Omega \text{ cm}$  to  $10^{12} \Omega \text{ cm}$  for the color display that is outside the range as claimed in this application. The limitation as claimed in this application is for a color liquid crystal display in which the black matrix having a resistance value of  $10^2 \Omega \text{ cm}$  to  $10^5 \Omega \text{ cm}$  that is different from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
